REINALDY HUTAPEA

Data Engineer | Data Management | Data Integration | ETL | Python | SQL | Data Quality
reinaldyhutapea@gmail.com | +6282246933771 | linkedin.com/in/reinaldy-hutapea | portofolio-reinaldy

Information Systems graduate from **Institut Teknologi Del (GPA: 3.63/4.00)** with industry experience in **Python-based automation, ETL, data integration, REST APIs, relational databases, and data quality.** At **PT Indonesia AirAsia**, developed a Python-based OCR workflow **(OpenCV, PaddleOCR)** to transform unstrusctured fuel-slip documents from seven vendors into structured data, reducing processing time from approximately **3 minutes to under 60 seconds** with over **95% field-level accuracy in testing**. At **PT Suzuki Finance Indonesia,** supported **REST API integration, master data connectivity, and database validation.** Additional experience includes dimensional modeling, source-to-target mapping, data warehousing, Tableau BI, and applied machine learning.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Data Engineering & Quality**: Data Pipelines, ETL/ELT Fundamentals, Data Integration, Data Extraction, Data Cleaning, Data Quality Validation, Data Integrity, Source-to-Target Mapping, Pipeline Documentation.
- **Programming & Processing**: Python (Pandas, NumPy), SQL, PHP, Regex, Fuzzy Matching, Google Apps Script.
- **Database & API Integration**: MySQL, PostgreSQL, SQL Server (SSMS), Relational Database Design, REST API Integration, Postman, Git.
- **Data Warehouse & BI:** Data Warehouse Concepts, Dimensional Modeling, Tableau, Data Visualization.
- **Cloud & Governance:** GCP Exposure (Google Compute Engine, Looker, Kubernetes); COBIT 2019, ITIL V3, IT Risk Assessment, Information Security Fundamentals.

NATIONAL COMPETENCIES & CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — **Oracle** *May 2026*
- Associate Data Scientist Competency Certification — **BNSP Digital Talent Scholarship, Komdigi** *Oct 2025*
- Data - AI Agent for Data Analysis (Final Score: 94.75) — **IBM SkillsBuild x Hacktiv8** *Sept 2026*
- HCIA-AI V4.0 — **Huawei** *Dec 2025*
- Intro to Data Analytics — **RevoU** *July 2024*
- Python Programming Competency (Google Authorized Partner) — **Dicoding Academy** *Nov 2024*

PROFESSIONAL EXPERIENCE

PT. Indonesia AirAsia | *Tangerang, Indonesia* *Aug 2024 – Jan 2025*
Data Automation & Integration Intern (OCR Data Pipeline)

- Developed a Python-based automated data extraction pipeline using **OpenCV** and **PaddleOCR** to transform **unstructured aircraft fuel-slip documents into structured operational data.**
- **Implemented image preprocessing**, Regex validation, fuzzy matching, and review controls to ensure data consistency and extraction quality across documents from **seven enterprise vendors.**
- **Reduced document processing time** from approximately **3 minutes to under 60 seconds** per document while **achieving over 95%** field-level extraction accuracy in testing.

Technology: Python, OpenCV, PaddleOCR, Regex, Google AppsScript.

PT. Suzuki Finance Indonesia | *Jakarta Timur, Indonesia* *Jun 2025 – Aug 2025*
Data Integration & Backend Intern (Digital Workflow)

- **Centralized master data integration** by securely connecting operational workflows with PHP-based REST APIs, ensuring robust data pipelines for enterprise reporting.
- Executed **end-to-end API and RDBMS database validation** using **Postman** to resolve data-structure inconsistencies and ensure highly secure data transmission.
- **Automated the digitization of field documentation and geolocation data** to enhance operational compliance and data integrity.

Technology: SQL, MySQL, REST API, PHP Backend, Postman, Relational Database Design, Git.

SELECTED DATA ENGINEERING & ANALYTICS PROJECTS

Student Admission Business Intelligence Dashboard (Tableau)
Business Intelligence Developer | Tableau

- Contributed to an **interactive dashboard** analyzing student-admission trends at Institut Teknologi Del for the 2023–2024 academic year, supporting **data preparation, dimensional modeling, source-to-target mapping, and ETL workflow documentation across multiple source files.**
- Developed **Tableau visualizations** with interactive filters for academic year, admission route, study programme, applicant distribution, and selection status to support admission monitoring and data-driven planning.

Sentiment Analysis Using E-WOM – Tourist Behaviour in Toba Regency
Data Analyst / Data Mining | GEMASTIK Project
- Collected public Google Maps reviews from 15 tourist destinations across Toba Regency using Scrapy and BeautifulSoup to build a dataset for tourist sentiment analysis.
- Cleaned, deduplicated, and structured review data using Python, Pandas, and NumPy, then applied machine learning and statistical techniques to identify patterns and factors influencing visitor opinions.

Netflix Content Analytics Dashboard
Data Analyst | Tableau
- Processed and analyzed approximately 8,000 Netflix content records using Excel and Google Sheets, performing data cleaning and developing an interactive Tableau dashboard with dynamic filters for content type, title, rating, and release year to identify content distribution and trends.

Enterprise IT Governance & Risk Audit (COBIT 2019 & ITIL V3)
IT Governance & Risk Auditor
- Conducted an IT governance maturity assessment **using COBIT 2019 and ITIL V3, focusing on IT Risk Management (APO12) and Information Security (DSS05).**
- Evaluated operational risks and information security controls, developing recommendations to improve data protection, system reliability, and SLA compliance.

Multimodal Automated Essay Scoring Research
Machine Learning Researcher
- Engineered an automated data evaluation model **utilizing Python and XGBoost** to process and analyze 1,054 complex records, demonstrating strong AI/ML capabilities.
- Performed rigorous data preparation, **feature engineering (26 multimodal features),** and **hyperparameter optimization utilizing Optuna** to achieve a highly reliable predictive scoring model (QWK: 0.6208).

SELECTED LEADERSHIP EXPERIENCE

Department of Science and Technology, BEM Institut Teknologi Del *Aug 2024 – Jan 2026*
Head of the Department
- Led a **20-member team** in planning and executing science, technology, and student-development programs (including GEMASTIK selections and tech seminars) **involving over 500 participants**.

Institut Teknologi Del | *Laguboti, Indonesia* *Jan 2024 – Jun 2024*
Technical Teaching Assistant | Computer Architecture
- Delivered 21 hours of laboratory instruction and evaluated 51 students in computer architecture, memory allocation, and procedural programming using C.

EDUCATION

Institut Teknologi Del
*Bachelor of **Information Systems** | **GPA: 3.63/4.00*** *Aug 2022- Aug 2026*
- **Related Coursework:** Information Technology Audit, Data Warehouse & Business Intelligence, Probability and Statistics, Data Mining, Database Systems.
